TGLN

Notification Indicators for Mandatory Patient Notification to TGLN

5.1 Notify TGLN for patients who have requested Medical Assistance in Dying (MAID) after the first confirmation of eligibility and all ventilated patients, including patients receiving life-sustaining non-invasive ventilation (e.g. BiPAP/CPAP), who meet **any** of the following criteria:

- G** **Grave Prognosis or GCS = 3**
- I** **Injured brain or non-recoverable injury/illness**
- F** **Family/patient initiated discussion of donation or withdrawal of life-sustaining measures**
- T** **Therapy limited, de-escalation of treatment, or withdrawal of life-sustaining measures discussion planned**

Trillium Gift of Life Network

Which patients do we call TGLN for?

5.2 For all non-ventilated patients **within critical care units (ED/ICU)** refer deaths:

- When the topic of donation is raised by the family/patient
- After the patient requesting MAID has received first confirmation of eligibility assessment
- Within one (1) hour of death

5.3 For all non-ventilated patients **outside critical care units (ED/ICU)** aged 79 and younger, refer deaths:

- When the topic of donation is raised by the family/patient
- After the patient requesting MAID has received first confirmation of eligibility assessment
- Within one (1) hour of death

Organ Donation in Ontario

More than 85% of Ontarians are in favor of organ donation.

However, only one in three Ontarians have registered their consent to donate.

**1 ORGAN DONOR CAN
SAVE 8 LIVES.**
