

General or Anatomic Pathologist

Quinte Health is recruiting one full time position in Pathology for its Department of Laboratory Medicine at Belleville General Hospital, beginning on or after **April 1, 2023** recognizing that new grads will only be available in July.

Specialty training in General Pathology or Anatomic Pathology from the RCPSC, CPSO registration and CMPA coverage are required. Training in a clinical pathology subspecialty (hematopathology, transfusion medicine, medical biochemistry, medical microbiology) and interest in leadership are assets, but not required. All qualified candidates, including final year pathology residents and subspecialty fellows, are encouraged to apply.

The successful candidate will be expected to adhere to the Behavior at Work policy, all of the Quinte Health values and participate in achieving our strategic direction. They will provide Anatomic Pathology coverage for surgical specimens, intraoperative consultations and weekend call coverage.

Quinte Health has an excellent group of pathology assistants and medical laboratory technologists. In 2021, there were 13,034 specimens including 11,763 surgical cases and 39 bone marrow specimens. Cytology, autopsies and most bone marrow specimens are referred out.

The Department of Laboratory Medicine has 3.5 FTE for Laboratory Medicine physicians. Quinte Health has strong links with Dynacare, Kingston Health Sciences Center and the Toronto hospitals.

Care is provided through four hospitals: Belleville General Hospital, North Hastings Hospital, Prince Edward County Memorial Hospital and Trenton Memorial Hospitals. This includes four emergency departments, operating rooms at three sites, inpatient services (including acute medicine, intensive care, obstetrics, pediatrics, mental health, complex continuing care, rehabilitation and surgery), a rehabilitation day hospital, children's treatment center, ambulatory care clinics, community mental health programs, and a range of diagnostic services.

This area includes some of the most diverse and beautiful countryside in Ontario. From the lakes of Bancroft down to the wine country of Prince Edward County, picturesque towns, Sandbanks Provincial Park, and through the more urban Belleville/Quinte West/Brighton corridor alongside Lake Ontario, almost every lifestyle interest can be found within the communities served by Quinte Health. The region offers a low cost of living, affordable homes, excellent schools as well as quality local theatre, shopping and restaurants. Belleville and Quinte West are located along the highway 401 corridor, and Toronto, Ottawa, Montreal, and Kingston are all within an easy driving distance.
